

Sharing Environmental Information

We transmit and introduce "information about eco-efficient products" and "environmental activities" via our official website and at events.

Environmental Report

Since 1994, we have been issuing an annual environmental report as the "PFU Environmental Report" (and the English version since 2003). From 2021, we are issuing it as the "Sustainability Report". We publish this information on our website. In addition to this report, we also share the latest information about eco-efficient products on our official website.

Showroom

We set up showrooms at our main sites in Japan to display our eco-efficient products, such as scanners and embedded computer products, and other environmentally conscious solutions.

Use of Green Power at Events

At the "PFU Christmas Charity Concert" (held in Kanazawa on December 11th), we contributed to spreading the use of natural energy in the nation and mitigating global warming by using renewable energy from wind power to supply the equipment in the venues with electricity.

Sharing Information

PFU is sharing information about sustainability and SDGs on its website.

PFU aims to be a business that can contribute to "solutions to social issues" and "a design for a sustainable society". We have posted a "Sustainability" page on our public website to share information about our way of thinking, course of action, and future direction for "sustainable operation", "environment (E)", "society (S)", and "governance (G)".

In addition, we have built an environment to distribute information within the company to raise awareness of SDGs among workers in the PFU group.

With the aim to create a business that has awareness of both industry and society, we have established an "in-house website for SDGs" and "in-house social networking service for SDGs" in which we encourage development of solutions to resolve social issues through our business operations and call for support in activities to make an environmental society.
