## Installation

1. Turn on the PC and log on as a user with Administrator privileges.
2. Insert the setup DVD-ROM into the DVD-ROM drive.

For Rack2-Filer Smart with Magic Desktop, continue by clicking the [Rack2-Filer Smart] button on the installer window that appears.

⇒ The [Welcome to the InstallShield Wizard for Rack2-Filer Smart] window appears.

### Tips: When .NET Framework is not installed

The "Rack2-Filer Smart requires the following items to be installed on your computer." message is displayed. Click the [Install] button to install .NET Framework (installation takes approximately five minutes). When installation is complete, the [Welcome to the InstallShield Wizard for Rack2-Filer Smart] window appears.

3. Click the [Next] button.  
⇒ The [License Agreement] window appears.
4. Confirm the content of the license agreement, select [I accept the terms in the license agreement], and then click [Next].  
⇒ The [Destination Folder] window appears.

## 5. Click the [Next] button.

In most cases, you do not need to change the installation folder. When changing the installation folder, only a folder on a local disk can be specified.

⇒ The [Ready to Install the Program] window appears.

## 6. Click the [Install] button.

⇒ The installation starts. When installation is complete, the [InstallShield Wizard Completed] window appears.

## 7. Click the [Finish] button.

⇒ The window closes, and installation completes.

⇒ After installation is complete, the Rack2-Filer Smart shortcut icon (  ) is displayed on the desktop.

## 8. For Rack2-Filer Smart with Magic Desktop, continue with the installation process and install Magic Desktop.

When you click the [Magic Desktop] button on the installer window, downloading of the installer starts. For the installation procedure, refer to the Magic Desktop home page (<http://www.pfu.fujitsu.com/en/products/magicdesktop/>).

### Tips: When installing .NET Framework at the same time as Rack2-Filer Smart

You may be requested to restart your PC. In this case, restart the PC. Also, run Windows Update and update .NET Framework to the latest status.
