- * To install this product, please login as Administrator or a member of Administrators Group (or as a user having administrative right).
- * End all applications before beginning the installation.
- * To install this product, run setup.exe.
- * When this product is installed on Windows Vista(R), Windows(R) 7, Windows(R) 8, or Windows(R) 8.1, the [User Account Control] screen appears. If you are a user with administrator privileges, select [Allow]. If you are a user without administrator privileges, select a user with administrator privileges, enter a password, and select the [OK] button.
- * This product cannot be installed on a network disk or removable disk.
- * This product cannot be installed in the folder where Rack2-Filer, Rack2-Viewer or Magic Desktop is installed.
- * When installing this product, do not use environment-dependent characters (exclusive to Unicode) for the login user name and program installation folder.
- * When installing .NET Framework, the following message may appear.
"The installation of (.NET Framework product name) appears to have failed.
Do you want to continue the installation?"
If the above message appears, cancel the installation and install the .Net Framework product that is indicated by Windows Update or the Microsoft home page. Then, install Rack2-Filer Smart.
- * Check the product's home page for the latest documents.
http://www.pfu.fujitsu.com/en/products/rack2_smart/manual.html

2. Cautions for Uninstallation

- * To uninstall this product, log in as the user who installed the product. This user must have administrator privileges.
- * End all applications before beginning the uninstallation.

- * After Rack2-Filer Smart is uninstalled, the storage room and backup folders and their subfolders/files remain. Delete these subfolders/files as needed.
- * When this product is uninstalled on Windows Vista(R), Windows(R) 7, Windows(R) 8, or Windows(R) 8.1, the [User Account Control] screen appears. If you are a user with administrator privileges, select [Allow]. If you are a user without administrator privileges, select a user with administrator privileges, enter a password, and select the [OK] button.

3. New Changes in the Rack2-Filer Smart V1.0 Update

=====

The new changes in the Rack2-Filer Smart V1.0 Update (V1.0L23) are as follows:

- * Improved the way of viewing/operating the thumbnail page in Rack2-Viewer.
 - To view the thumbnails, the [Thumbnail View] button at the top right in Rack2-Viewer can be used.
 - The display area of thumbnails are enlarged and can be scrolled.
 - The display size of thumbnails can be enlarged/shrunk by using the zoom bar.
 - Another way of selecting thumbnails is added. Multiple thumbnails can be selected by using the Shift/Ctrl key.
 - Thumbnails can be moved/copied by using the drag and drop operations with a mouse.
- * Improved the hyperlink function.
 - Items of the "Contents" can be set to the linked page of the hyperlink.
 - The number of characters that can be entered in the URL/file of the hyperlink is now 1024.
- * Improved the page turning function in Rack2-Viewer.
Added the high speed mode (without animation) to the page turning function.
- * Supports a new way of authentication for SugarSync.
Once the authentication is performed, the cloud storage (SugarSync) can be available continuously.
- * Corrected the problem that the printer set for ordinary use might be changed.
- * Corrected the problem the specified size might not be accepted when it is printed out.

The new changes in the Rack2-Filer Smart V1.0 Update (V1.0L22) are as follows:

- * Corrected the problem of importing high quality images or large size data that sometimes could not be imported before.

The new changes in the Rack2-Filer Smart V1.0 Update (V1.0L21) are as follows:

- * Enhanced the linkage with ScanSnap SV600.
The "point retouch" function, with which the captured finger areas are filled in, is available when scanning a flat document.
- * Multiple Office documents can be imported once at a time.

The new changes in the Rack2-Filer Smart V1.0 Update (V1.0L20) are as follows:

- * Supports ScanSnap SV600.

The image of a double-page spread document such as a book or a magazine as well as the cover of a document can be imported as they are.

- * Binders which store images that are imported can be specified in the Rack2-Bookshelf window.
In addition, a new binder can be created when importing images.
- * After importing images to a binder, Rack2-Viewer, where you can check the import result, is automatically displayed.
- * The cover of a binder can be displayed in full-screen.
In addition, the height and the width of a binder can be changed.
- * Tool information such as sticky notes or memos can be copied.
- * The right-click menu is available on Rack2-Viewer.

The new changes in the Rack2-Filer Smart V1.0 Update (V1.0L14) are as follows:

- * Corrected the program to get Microsoft .NET Framework 4 Language Pack appropriate for the Windows language environment to be installed.

The new changes in the Rack2-Filer Smart V1.0 Update (V1.0L13) are as follows:

- * Supports Android devices. Download the application "Rack2-Filer Smart for Android". The term "iOS" used in the menu item names and other item names has been changed to "Mobile Device".
- * Corrected the problem that a part of a page was not printed when you print a page from Rack2-Viewer. This problem occurred when you change the screen font size in the Windows settings.
- * Corrected the problem that the photo binders might not be migrated properly with "Rack2-Filer Smart - Migration Tool". Also, improved the content of the migration result notice file.

The new changes in the Rack2-Filer Smart V1.0 Update (V1.0L12) are as follows:

- * Corrected the problem that Rack2-Filer binders might not be migrated properly when "Rack2-Filer Smart - Migration Tool" was run.
- * Corrected the problem that an error message ("Failed to start Rack2-Viewer.") was displayed and the binders that had been migrated with "Rack2-Filer Smart - Migration Tool" could not be browsed when the binders were opened.
- * Added the option to specify the folder in SugarSync (cloud storage service) as a storage room so that a linked folder could be newly created.

4. Cautions for Use

- * When you want to import the manual "Rack2-Filer Smart Your Guide" as a binder style, select [Import] from the binder operation menu on the Rack2-Bookshelf window and then import "UsersGuide.rk2s" from "<Installation Folder>\¥DefaultData".

Default location of <Installation Folder> is as follows:

32-bit version operating system:

"C:\¥Program Files\¥PFU\¥Raku2Smart"

64-bit version operating system:

"C:\¥Program Files (x86)\¥PFU\¥Raku2Smart"

- * When the storage room is located in a network folder and data is shared, several fonts do not appear properly if the fonts are not installed on the client computer.
- * This product does not support virtual environments such as remote desktop.
- * Do not log off or shutdown while an operation is being processed.
- * When running this product, do not use environment-dependent characters (exclusive to Unicode) for the login user name or for attached file names when sending e-mail.
- * Do not specify a Rack2-Filer Smart storage room folder or its subfolders as the sync folder of the cloud storage. Synchronization of binder data is not supported.
