       Windows(R) 7 Home Premium Service Pack 1 or later
       Windows(R) 7 Professional Service Pack 1 or later
       Windows(R) 7 Enterprise Service Pack 1 or later
       Windows(R) 7 Ultimate Service Pack 1 or later
       Windows(R) 8
       Windows(R) 8 Pro
       Windows(R) 8 Enterprise
       Windows(R) 8.1
       Windows(R) 8.1 Pro
```

```
           Windows(R) 8.1 Enterprise
           Windows(R) 10 Home
           Windows(R) 10 Pro
           Windows(R) 10 Enterprise
           Windows(R) 10 Education

    *1: Following languages are supported.
         - English
         - French
         - German
         - Italian
         - Spanish
         - Russian
         - Portuguese
         - Chinese (simplified)
         - Chinese (traditional)
         - Korean
         - Japanese

  * To install this product, please login as Administrator or a member of
    Administrators Group (or as a user having administrative right).

  * End all applications before beginning the installation.

  * When this product is installed on Windows Vista(R), Windows(R) 7,
    Windows(R) 8, Windows(R) 8.1, or Windows(R) 10 the [User Account Control]
    screen appears. If you are a user with administrator privileges, select
    [Allow]. If you are a user without administrator privileges, select a user
    with administrator privileges, enter a password, and select the [OK] button.

  * When installing this product, do not use environment-dependent characters
    (exclusive to Unicode) for the logon user name and program installation
    folder.

  * Check the product's home page for the latest documents.
    http://www.pfu.fujitsu.com/en/products/rack2_smart/manual.html

2. Cautions for Uninstallation
   ==============================

  * To uninstall this product, log in as the user who installed the product.
    This user must have administrator privileges.

  * End all applications before beginning the uninstallation.

  * After Rack2-Filer Smart is uninstalled, the storage room and backup folders
    and their subfolders/files remain. Delete these subfolders/files as needed.

  * When this product is uninstalled on Windows Vista(R), Windows(R) 7,
    Windows(R) 8, Windows(R) 8.1, or Windows(R) 10 the [User Account Control]
    screen appears. If you are a user with administrator privileges, select
    [Allow]. If you are a user without administrator privileges, select a user
    with administrator privileges, enter a password, and select the [OK] button.

3. New Changes in the Rack2-Filer Smart V1.0 Update
   ================================================
       The new changes in the Rack2-Filer Smart V1.0 Update (V1.0L27) are as
       follows:

  * Added the option to output a whole storage room with Rack2-Filer Smart
    data to a folder in Windows.

       The new changes in the Rack2-Filer Smart V1.0 Update (V1.0L26) are as
       follows:

  * Supports ScanSnap Manager V6.5.

  * Corrected the following problems:
     - You sometimes could not edit pages when working in the thumbnail view
       mode.
     - Loading of thumbnail images sometimes failed, and the message [Failed
       to acquire page.] was displayed.

       The new changes in the Rack2-Filer Smart V1.0 Update (V1.0L24) are as
       follows:
```

* Corrected the problem that the data may be lost from binders on which
  OCR is running in the Rack2-Bookshelf window when the program is shut
  down from the Windows taskbar or from the task manager.

  The new changes in the Rack2-Filer Smart V1.0 Update (V1.0L23) are as
  follows:

* Improved the way of viewing/operating the thumbnail page in Rack2-Viewer.
  - To view the thumbnails, the [Thumbnail View] button at the top right
    in Rack2-Viewer can be used.
  - The display area of thumbnails are enlarged and can be scrolled.
  - The display size of thumbnails can be enlarged/shrunk by using the
    zoom bar.
  - Another way of selecting thumbnails is added. Multiple thumbnails can
    be selected by using the Shift/Ctrl key.
  - Thumbnails can be moved/copied by using the drag and drop operations
    with a mouse.

* Improved the hyperlink function.
  - Items of the "Contents" can be set to the linked page of the hyperlink.
  - The number of characters that can be entered in the URL/file of the
    hyperlink is now 1024.

* Improved the page turning function in Rack2-Viewer.
  Added the high speed mode (without animation) to the page turning
  function.

* Supports a new way of authentication for SugerSync.
  Once the authentication is performed, the cloud storage (SugarSync) can
  be available continuously.

* Corrected the problem that the printer set for ordinary use might be
  changed.

* Supports the print size that is larger than A4.

* Usability has been improved when moving between or deleting pages that
  contain source files, or pages that were scanned as a 2-page spread.

  The new changes in the Rack2-Filer Smart V1.0 Update (V1.0L22) are as
  follows:

* Corrected the problem of importing high quality images or large size data
  that sometimes could not be imported before.

  The new changes in the Rack2-Filer Smart V1.0 Update (V1.0L21) are as
  follows:

* Enhanced the linkage with ScanSnap SV600.
  The "point retouch" function, with which the captured finger areas are
  filled in, is available when scanning a flat document.

* Multiple Office documents can be imported once at a time.

  The new changes in the Rack2-Filer Smart V1.0 Update (V1.0L20) are as
  follows:

* Supports ScanSnap SV600.
  The image of a double-page spread document such as a book or a magazine as
  well as the cover of a document can be imported as they are.

* Binders which store images that are imported can be specified in the
  Rack2-Bookshelf window.
  In addition, a new binder can be created when importing images.

* After importing images to a binder, Rack2-Viewer, where you can check
  the import result, is automatically displayed.

* The cover of a binder can be displayed in full-screen.
  In addition, the height and the width of a binder can be changed.

* Tool information such as sticky notes or memos can be copied.

* The right-click menu is available on Rack2-Viewer.

  The new changes in the Rack2-Filer Smart V1.0 Update (V1.0L14) are as
  follows:

* Corrected the program to get Microsoft .NET Framework 4 Language Pack
   appropriate for the Windows language environment to be installed.

   The new changes in the Rack2-Filer Smart V1.0 Update (V1.0L13) are as
   follows:

 * Supports Android devices. Download the application "Rack2-Filer Smart for
   Android". The term "iOS" used in the menu item names and other item names
   has been changed to "Mobile Device".

 * Corrected the problem that a part of a page was not printed when you print
   a page from Rack2-Viewer. This problem occurred when you change the screen
   font size in the Windows settings.

 * Corrected the problem that the photo binders might not be migrated properly
   with "Rack2-Filer Smart - Migration Tool". Also, improved the content of
   the migration result notice file.

   The new changes in the Rack2-Filer Smart V1.0 Update (V1.0L12) are as
   follows:

 * Corrected the problem that Rack2-Filer binders might not be migrated
   properly when "Rack2-Filer Smart - Migration Tool" was run.

 * Corrected the problem that an error message ("Failed to start
   Rack2-Viewer.") was displayed and the binders that had been migrated with
   "Rack2-Filer Smart - Migration Tool" could not be browsed when the binders
   were opened.

 * Added the option to specify the folder in SugarSync (cloud storage service)
   as a storage room so that a linked folder could be newly created.

4. Cautions for Use
===================

 * When you want to import the manual "Rack2-Filer Smart Your Guide" as a
   binder style, select [Import] from the binder operation menu on the
   Rack2-Bookshelf window and then import "UsersGuide.rk2s" from
   "<Installation Folder>¥DefaultData".

   Default location of <Installation Folder> is as follows:
    32-bit version operating system:
      "C:¥Program Files¥PFU¥Raku2Smart"
    64-bit version operating system:
      "C:¥Program Files(x86)¥PFU¥Raku2Smart"

 * When the storage room is located in a network folder and data is shared,
   several fonts do not appear properly if the fonts are not installed on the
   client computer.

 * This product does not support virtual environments such as remote desktop.

 * Do not log off or shutdown while an operation is being processed.

 * When running this product, do not use environment-dependent characters
   (exclusive to Unicode) for the logon user name or for attached file names
   when sending e-mail.

 * Do not specify a Rack2-Filer Smart storage room folder or its subfolders as
   the sync folder of the cloud storage. Synchronization of binder data is not
   supported.
